

Fullstack Tech Lead & Scrum Master with 10 years of experience, I work on demanding Java / Angular projects both as a senior developer and as a technical leader. Experienced with major enterprise clients (EDF, Airbus, CNAM, Ministry of Agriculture), I take ownership of architecture, code quality and end-to-end delivery. Available for long-term freelance contracts.

Available from January 2026

CORE FUNCTIONAL SKILLS

1. Back End and Front End development (web & mobile)
2. Technical leadership & team upskilling
3. Software architecture and design
4. Agile Delivery / Scrum Master
5. Containerisation and deployment (DevOps)
6. Technical and functional documentation

Methodologies: Scrum, DevOps, CI/CD

TECHNICAL SKILLS

SYSTEMS	LANGUAGES & FRAMEWORKS	DATABASES	DEVOPS & TOOLS
Linux MacOS Windows	Java 8 → 25, Kotlin, Ktor Spring / Spring Boot, Jakarta EE, Vaadin Angular, VueJS, Vuetify, TypeScript Bootstrap, Bash / Cron, Python <i>PHP5 (legacy maintenance)</i>	PostgreSQL MongoDB Oracle	Kafka (event streaming) Docker, Kubernetes, OpenShift Jenkins, Nginx Git / GitLab, SVN, Sonar Jira / Confluence IntelliJ IDEA / VS Code

EDUCATION & CERTIFICATIONS

2020	DevOps Foundation Certification
2020	Scrum Master I Certification
2016 – 2018	Master's Degree: Software Engineering Management
2013 – 2015	HND: IT and Networks for Industry and Technical Services
2013	Baccalaureate: STI2D — Digital Information Systems

LANGUAGES

French (Native) · English (Professional)

Personal projects

Fullstack Tech Lead — Independent · Jan. 2026 → present

Full end-to-end design and development of SaaS products in complete autonomy — from architecture to deployment. Systematic Claude Code workflow across all projects: pair-programming, test generation, refactoring, automated reviews, conventions documented via CLAUDE.md / AGENTS.md.

Entrevia — [entrevia.dev](#)

SaaS platform for technical interview preparation for developers

Spaced-repetition flashcards, QCM, mock interview simulation with AI scoring (ReScript v11), B2B recruiter mode, Stripe subscriptions and Chrome extension. 100+ stacks covered (Java, Angular, React, Kotlin, DevOps, AI...).

- **LLM integration in production:** batch scoring via Claude Haiku 4.5 (Anthropic SDK), adaptive prompt engineering by difficulty level (junior/mid/senior), structured stack extraction from PDF job postings, quota management and cost guardrails.
- **Modern frontend architecture:** React 19, ReScript v11, Emotion CSS-in-JS, Turborepo monorepo, Yarn 4 Berry, Turbopack — stack matching the most demanding Senior Frontend positions. WCAG accessibility, Vitest + RTL + Playwright.
- **Security & payments:** Auth.js v5 (Google / GitHub OAuth + magic link), Stripe webhooks with plan and bonus pack management, backend guards for premium features.
- **End-to-end design:** architecture, data model (Drizzle + PostgreSQL 17), type-safe tRPC API, FR/EN i18n, offline-first PWA, VPS deployment (nginx reverse proxy + cache).

Normance

B2B REST webservice — automatic generation of CSR/CSRD certificates for refurbished products

ADEME carbon impact calculation, usage-based billing, multi-tenant. Presented to the #2 European player in IT refurbishment.

- **Production-ready API:** multi-tenant API key authentication, plan-based rate limiting, signed webhooks, on-the-fly PDF generation (Puppeteer + QR code), batch endpoints up to 100 certificates, auto-generated Swagger documentation.
- **Robustness & operations:** async queues BullMQ + Redis, 36 Jest integration tests, Zod validation on all endpoints, health monitoring, helmet + CORS.

Legacode

SaaS code audit platform — all languages, all legacy, all versions

Universal code audit with human expert validation. Key differentiator: **zero AI processes client code** (GDPR, NDA, regulated industries). SHA-256 certified deletion with timestamped PDF attestation.

- **Multi-tool orchestration:** SonarQube + Semgrep + OWASP Dependency-Check + Trivy pipeline, automatic technology detection, expert PDF report generated at mission close.
- **Sovereign OVH infrastructure:** client storage on self-hosted MinIO (code never leaves the infrastructure), full traceability upload → analysis → deletion, SHA-256 hash verified at every step.
- **Fullstack architecture:** Spring Boot / Java 25 backend, Next.js 16 frontend deployed on Vercel, PostgreSQL, Traefik v3 SSL reverse proxy.

Knido & Knido Mobile

Community platform and marketplace — textile arts (knitting, crochet, sewing, embroidery)

Inventory management, pattern catalogue, community features, Premium subscription and native iOS/Android mobile application.

- **Web + mobile on shared tRPC API:** Next.js 16 / App Router for web, Expo + expo-router for mobile, zero business logic duplication, cloud iOS/Android build via EAS.
- **E-commerce & marketplace:** pattern purchase via Stripe Checkout, Premium subscription, marketplace commission via Stripe Connect, R2 upload (photos + PDF) with presigned URLs.

OTHER PROJECTS (FULL AUTONOMY, DESIGN → DEPLOYMENT)

Godot mobile games: Fruitower, Valcœur, Last Zombie Ride, Knitting Tycoon — integrated Midjourney asset pipeline.

SaaS & websites: Doctura (Healthcare DMS), Atelier du Fil, Carnet d'Route (Kotlin/Ktor + Angular + Helm/K8s), Mission Tracker (real-time scraper for 24 freelance platforms), Le Vallon des Kangourous (Next.js + Payload CMS), Lasserre Consulting website (Angular 21).

Migration tool: Java AST analyser for COBOL → Java 25 migration, Angular HTML report — banking sector.

SHARED VPS INFRASTRUCTURE

Hardened self-hosted VPS (key-only SSH, fail2ban, nginx + app-level rate limiting), hosting all projects. Claude agent run daily for automated security audit: log review, CVE checking, configuration control, anomaly alerting.

Dataraxys / Nuamouv

Fullstack Tech Lead · Apr. 2025 → Dec. 2025 · 8 months

PROJECT

Returned as a permanent employee at Dataraxys from April 2025. Took ownership of the technical scope for new Nuamouv clients (urban transport) as well as the parent company Prêt à Partir. Development, maintenance and delivery of new solutions, team mentoring and quality oversight.

ACHIEVEMENTS

- Delivered **4 clients** with complete ticketing systems: sales funnel, real-time user tracking, QR code cards, tracking profile
- Migrated the entire application fleet from **Java 11** → **Java 25**
- Designed and deployed an **email signature tool** for 1,000+ group employees
- Mentored and upskilled the team's Fullstack Tech Lead
- Managed deliveries across 3 environments: Dev / QA / Pre-prod
- Full Back End and Front End development across all projects
- Ensured and guaranteed the quality of all deliverables

TEAM

2 Tech Leads · 3 Senior Developers · 2 Developers

DURATION

8 months (Apr. 2025 → Dec. 2025)

Alliance4U — Consultant

Developer & Fullstack Tech Lead · Jun. 2019 → Apr. 2025 · 5 years 10 months

Consulting contracts at major enterprise clients. Progressed from Fullstack Developer to Tech Lead, with a dual **Tech Lead + Scrum Master** role on one contract. Sectors: transport, retail, public health, aerospace, agriculture, energy.

Dataraxys / Nuamouv

Fullstack Tech Lead · Mar. 2024 → Apr. 2025 · 13 months · *final contract — transition to direct employment*

Transition contract preceding the return as a direct employee at Dataraxys. Took over the Nuamouv technical scope (urban transport).

- Java / Jakarta EE
- VueJS
- SQL / NoSQL
- Portainer (Docker)
- Nginx
- GitLab

Pharmacies Lafayette

Fullstack Tech Lead · Sep. 2023 → Feb. 2024 · 6 months

Rescued a non-functional project (production elements missing from version control): full remediation, new features and deliveries.

- Full project audit and remediation
- Managed deliveries across 2 environments: QA / Pre-prod

- .NET
- AngularJS
- PostgreSQL
- Git
- Jira
- Confluence
- VS Code

CNAM — Mon Espace Santé

Fullstack Tech Lead & Scrum Master · Aug. 2022 → Aug. 2023 · 1 year

Development of the secure messaging system for Mon Espace Santé, enabling healthcare professionals to communicate with their patients.

- Facilitated Scrum ceremonies for a 15-person team (1 SM, 1 BA, 1 PO, 2 TL, 7 Dev, 2 apprentices)
- Upskilled the Fullstack Tech Lead and apprentices
- Quality uplift: best practices, Sonar, test coverage
- Deliveries across 3 environments: Dev / QA / Pre-prod

- Java
- Spring
- VueJS
- Vuetify
- Angular
- Kafka
- PostgreSQL
- Jenkins
- Sonar
- Jira
- Confluence

Alliance4U — Consultant

Developer & Fullstack Tech Lead · Jun. 2019 → Apr. 2025 · continued

Airbus

Fullstack Tech Lead · Jan. 2022 → Aug. 2022 · 7 months

Development and maintenance of a heavy client for airline fleet planning.

- Task coordination with English-speaking teams
- Upskilled a Junior Fullstack Tech Lead

Java Spring Swing PostgreSQL Git Jira Confluence NetBeans

Ministry of Agriculture

Consultant Fullstack Developer · Mar. 2021 → Dec. 2021 · 7 months

Management portal for professional and recreational fishing.

- Wrote test plans and batch development
- Code quality: Sonar checks and cross-testing

Java / SpringBoot Framework ORION PostgreSQL SVN Jira Confluence NetBeans

Thales Alenia Space

Consultant Fullstack Developer · Feb. 2020 → Apr. 2020 · 2 months

Development and maintenance of a satellite control and analysis application.

- Rewrote and split existing integration tests
- Adapted test scenarios to test team needs
- Improved test readability, comprehension and maintainability

Java Angular Git Jira

EDF

Consultant Fullstack Developer · Jun. 2019 → Jan. 2020 · 7 months

Supervision of EDF applications for the business market.

- Designed and delivered shared libraries adopted by EDF teams
- Developed the application supervision portal
- Training sessions and meetings for library implementation

Java VueJS / Vuetify Angular Python Kafka Kubernetes Docker Nginx OpenShift GitLab

Dataraxys / Nuamouv

Fullstack Developer · Feb. 2016 → Jun. 2019 · 3 years

PROJECT

Development of internal and external solutions for the Prêt à Partir group. First professional experience at a human-scale startup, from design through to production — covering the full business scope: transport, travel, thalassotherapy, e-commerce.

ACHIEVEMENTS

- Built internal projects from scratch: HR solution (Java/Vaadin – MongoDB), travel & thalasso referral (Java/Jakarta EE – Webservice)
- Optimised existing projects: transport, travel, thalasso, e-commerce
- Migrated the entire infrastructure to Docker
- Configuration management: global variables, multi-environment, version control
- Android device configuration and client delivery
- Client presentations and training
- Created and monitored Git repositories + code quality tracking
