

Fullstack Tech Lead & Scrum Master with 10 years of experience, I work on demanding Java / Angular projects as both a senior developer and technical leader. With a proven track record at major accounts (EDF, Airbus, CNAM, Ministry of Agriculture), I take ownership of architecture, code quality and end-to-end delivery. Available for long-term freelance assignments.

Available from January 2026

CORE FUNCTIONAL SKILLS

1. Back End and Front End development (web & mobile)
2. Technical leadership & team upskilling
3. Software architecture and design
4. Agile Delivery / Scrum Master
5. Containerisation and deployment (DevOps)
6. Technical and functional documentation

Methodologies: Scrum, DevOps, CI/CD

TECHNICAL SKILLS

SYSTEMS	LANGUAGES & FRAMEWORKS	DATABASES	DEVOPS & TOOLS
Linux	Java 8 → 25, Kotlin, Ktor	PostgreSQL	Kafka (event streaming)
MacOS	Spring / Spring Boot, Jakarta EE, Vaadin	MongoDB	Docker, Kubernetes,
Windows	Angular, VueJS, Vuetify, TypeScript	Oracle	OpenShift
	Bootstrap, Bash / Cron, Python		Jenkins, Nginx
	<i>PHP5 (legacy maintenance)</i>		Git / GitLab, SVN,
			Sonar
			Jira / Confluence
			IntelliJ IDEA / VS Code

EDUCATION & CERTIFICATIONS

2020	DevOps Foundation Certification
2020	Scrum Master I Certification
2016 – 2018	Master's Degree: Software Engineering Management
2013 – 2015	HND: Computer Science and Networking for Industry
2013	High School Diploma: STI2D — Digital Information Systems

Personal Projects

Fullstack Tech Lead — Independent · Jan. 2026 → present

End-to-end design and development of full SaaS products with complete autonomy — from architecture to deployment. Systematic Claude Code workflow across all projects: pair-programming, test generation, refactoring, automated reviews, conventions documented via CLAUDE.md / AGENTS.md.

Entrevia — entrevista.dev

SaaS platform for technical interview preparation for developers

Spaced-repetition flashcards, AI-scored interview simulation, Stripe subscriptions and Chrome extension. 100+ stacks covered (Java, Angular, React, Kotlin, DevOps, AI...).

- **LLM integration in production:** batch scoring of user answers via Claude Haiku 4.5 (Anthropic SDK), adaptive prompt engineering by difficulty level (junior/mid/senior), structured stack extraction from job-offer PDFs, quota management and cost guardrails.
- **Security & payments:** Auth.js v5 (Google / GitHub OAuth + magic link), Stripe webhooks with plan and bonus pack management, backend guards for premium features.
- **End-to-end design:** architecture, data model (Drizzle + PostgreSQL 17), type-safe tRPC API, FR/EN i18n, offline-first PWA, VPS deployment (nginx reverse proxy + cache).

Next.js 16 TypeScript tRPC Drizzle PostgreSQL Anthropic SDK Stripe Auth.js Docker
nginx Sentry Playwright Vitest Claude Code

Normance

B2B REST Webservice — automated generation of CSR/CSRD certificates for refurbished products

ADEME carbon impact calculation, usage-based billing, multi-tenant. Presented to the #2 European player in refurbished IT.

- **Production-ready API:** multi-tenant API key authentication, per-plan rate limiting, signed webhooks, on-the-fly PDF generation (Puppeteer + QR code), batch endpoints up to 100 certificates, auto-generated Swagger documentation.
- **Reliability & operations:** async queues BullMQ + Redis, 36 Jest integration tests, Zod validation on all endpoints, health monitoring, helmet + CORS.

Node.js TypeScript Fastify Prisma PostgreSQL BullMQ Redis Puppeteer Jest Zod
Swagger Claude Code

Fullstack Tech Lead — Independent · Jan. 2026 → present

Legacode

Universal code audit SaaS — all languages, all legacy, all versions

Universal code audit with human expert validation. Key differentiator: **zero AI processes client code** (GDPR, NDA, regulated industries). SHA-256 certified deletion with timestamped PDF attestation.

- **Multi-tool orchestration:** SonarQube + Semgrep + OWASP Dependency-Check + Trivy pipeline, automatic technology detection, expert PDF report generated at the end of each engagement.
- **Sovereign OVH infrastructure:** client code stored on self-hosted MinIO (never leaves the infrastructure), full traceability upload → analysis → deletion, SHA-256 hash verified at each step.
- **Fullstack architecture:** Spring Boot / Java 25 backend, Next.js 16 frontend deployed on Vercel, PostgreSQL, Traefik v3 SSL reverse proxy.

Java 25	Spring Boot	Next.js 16	PostgreSQL	MinIO	SonarQube	Semgrep	OWASP	Trivy
Traefik	Docker	OVH VPS	Claude Code					

Knido & Knido Mobile

Community platform and marketplace — textile arts (knitting, crochet, sewing, embroidery)

Inventory management, pattern catalogue, community features, Premium subscription and native iOS/Android mobile application.

- **Web + mobile on a shared tRPC API:** Next.js 16 / App Router for web, Expo + expo-router for mobile, zero business logic duplication, cloud iOS/Android build via EAS.
- **E-commerce & marketplace:** pattern purchases via Stripe Checkout, Premium subscription, marketplace commission via Stripe Connect, R2 upload (photos + PDFs) with presigned URLs.

Next.js 16	Expo	TypeScript	tRPC	Drizzle	PostgreSQL	Auth.js	Stripe	Stripe Connect
Cloudflare R2	NativeWind	EAS Build	Docker	Jenkins	Claude Code			

OTHER PROJECTS (FULL AUTONOMY, DESIGN → DEPLOYMENT)

Godot mobile games: Fruitower, Valcœur, Last Zombie Ride, Knitting Tycoon — integrated Midjourney asset pipeline.

SaaS & web: Doctura (Healthcare DMS), Atelier du Fil, Carnet d'Route (Kotlin/Ktor + Angular + Helm/K8s), Mission Tracker (real-time scraper across 24 freelance platforms), Le Vallon des Kangourous (Next.js + Payload CMS), Lasserre Consulting website (Angular 21).

Migration tool: Java legacy AST analyser for COBOL → Java 25 migration, Angular HTML report — banking sector.

SHARED VPS INFRASTRUCTURE

Self-hosted hardened VPS (SSH key-only, fail2ban, nginx + application-level rate limiting), hosting all projects.

Claude agent run daily for automated security audits: log review, CVE checks, configuration control, anomaly alerting.

Dataraxys / Nuamouv

Fullstack Tech Lead · Apr. 2025 → Dec. 2025 · 8 months

PROJECT

Rejoined Dataraxys as a full-time employee from April 2025. Took ownership of the technical scope for new Nuamouv clients (urban transport) as well as the parent company Prêt à Partir. Development, maintenance and delivery of new solutions, team coaching and quality oversight.

ACHIEVEMENTS

- Delivered full ticketing solutions for **4 clients**: sales funnel, real-time user tracking, QR code cards, user profile
- Migrated the entire application stack from **Java 11** → **Java 25**
- Designed and deployed an **email signature tool** for 1,000+ group employees
- Mentored and upskilled the team's Fullstack Tech Lead
- Managed deliveries across 3 environments: Dev / QA / Pre-prod
- Back End and Front End development across all projects
- Monitoring and ensuring the quality of delivered products

TECHNICAL ENVIRONMENT

Java / Jakarta EE	VueJS	Vaadin	JavaScript	SQL / NoSQL	HTML5 / CSS	Bash / Cron
PHP5 (legacy)	Tomcat	Portainer (Docker)	Nginx	GitLab	IntelliJ IDEA	MS Office

TEAM

2 Tech Leads · 3 Senior Developers · 2 Developers

DURATION

8 months (Apr. 2025 → Dec. 2025)

Alliance4U — Consultant

Developer & Fullstack Tech Lead · Jun. 2019 → Apr. 2025 · 5 yrs 10 months

Consulting assignments in client environments at major accounts. Progression from Fullstack Developer to Tech Lead, with a dual **Tech Lead + Scrum Master** role on one mission. Sectors covered: transport, retail, public health, aeronautics, agriculture, energy.

Dataraxys / Nuamouv

Fullstack Tech Lead · Mar. 2024 → Apr. 2025 · 13 months · *last mission — transition to direct hire*

Transition mission prior to rejoining Dataraxys as a direct employee. Taking over the Nuamouv (urban transport) technical scope.

Java / Jakarta EE · VueJS · SQL / NoSQL · Portainer (Docker) · Nginx · GitLab

Pharmacies Lafayette

Fullstack Tech Lead · Sep. 2023 → Feb. 2024 · 6 months

Taking over a non-functional project (production elements absent from version control): full restoration, new developments and deliveries.

- Full project audit and restoration
- Managed deliveries across 2 environments: QA / Pre-prod

.NET · AngularJS · PostgreSQL · Git · Jira · Confluence · VS Code

CNAM — Mon Espace Santé

Fullstack Tech Lead & Scrum Master · Aug. 2022 → Aug. 2023 · 1 year

Development of the secure messaging feature of Mon Espace Santé, enabling healthcare professionals to communicate with their patients.

- Facilitated Scrum ceremonies for a 15-person team (1 SM, 1 BA, 1 PO, 2 TL, 7 Dev, 2 apprentices)
- Upskilled the Fullstack TL team and apprentices
- Code quality improvement: best practices, Sonar, test coverage
- Deliveries across 3 environments: Dev / QA / Pre-prod

Confluence

NetBeans

Ministry of Agriculture

Fullstack Developer Consultant · Mar. 2021 → Dec. 2021 · 7 months

Management website for professional and leisure fishing.

- Test plan writing and batch development
- Code quality: Sonar verification and cross-testing

Java / SpringBoot

Framework ORION

PostgreSQL

SVN

Jira

Confluence

NetBeans

Thales Alenia Space

Fullstack Developer Consultant · Feb. 2020 → Apr. 2020 · 2 months

Development and maintenance of a satellite control and analysis application.

- Rewriting and restructuring of existing integration tests
- Adaptation of test scenarios to the needs of the testing teams
- Improved readability, comprehension and maintainability of the test suite

Java

Angular

Git

Jira

EDF

Fullstack Developer Consultant · Jun. 2019 → Jan. 2020 · 7 months

Supervision of EDF applications for the business market.

- Design and delivery of shared libraries adopted by EDF teams
- Development of the application supervision website
- Training sessions and meetings for library implementation

Dataraxys / Nuamouv

Fullstack Developer · Feb. 2016 → Jun. 2019 · 3 years

PROJECT

Development of internal and external solutions for the Prêt à Partir group. First professional experience in a human-scale startup, from design to production — covering the full business scope: transport, travel, thalasso, online sales.

ACHIEVEMENTS

- Built internal projects end-to-end: HR solution (Java/Vaadin – MongoDB), travel & thalasso referral (Java/Jakarta EE – Webservice)
- Optimised existing projects: transport, travel, thalasso, online sales
- Migrated the entire infrastructure to Docker
- Configuration management: global variables, multi-environment, version control
- Android device configuration and client delivery
- Client presentations and training sessions
- Created and monitored Git repositories + code quality oversight
